

Appetising research

– Creating value together

Nofima is a business oriented research group working in research and development for the aquaculture, fisheries and food industry in Norway.

Nofima was established on January 1, 2008, and has about 470 employees.

The group's total turnover in 2008 was about NOK 470 million.

The Nofima Group is divided into the following four business divisions:

Nofima Marin (marine)

Nofima Marin engages in research, development, innovation and knowledge dissemination for the national and international fisheries and aquaculture industries. Our core areas are breeding and genetics, feeds and nutrition, fish health, efficient and sustainable production, process and product development of seafood and marine bioprospecting.

Nofima Mat (food)

Nofima Mat engages in research and consultancy regarding food processing. Nofima Mat works for improved food quality, raw materials processing and nutrition. Our core areas are raw materials quality and process optimisation, safe and long lasting food, consumer and sensory sciences, food and health, industrial gastronomy and innovation.

Nofima Ingrediens (ingredients)

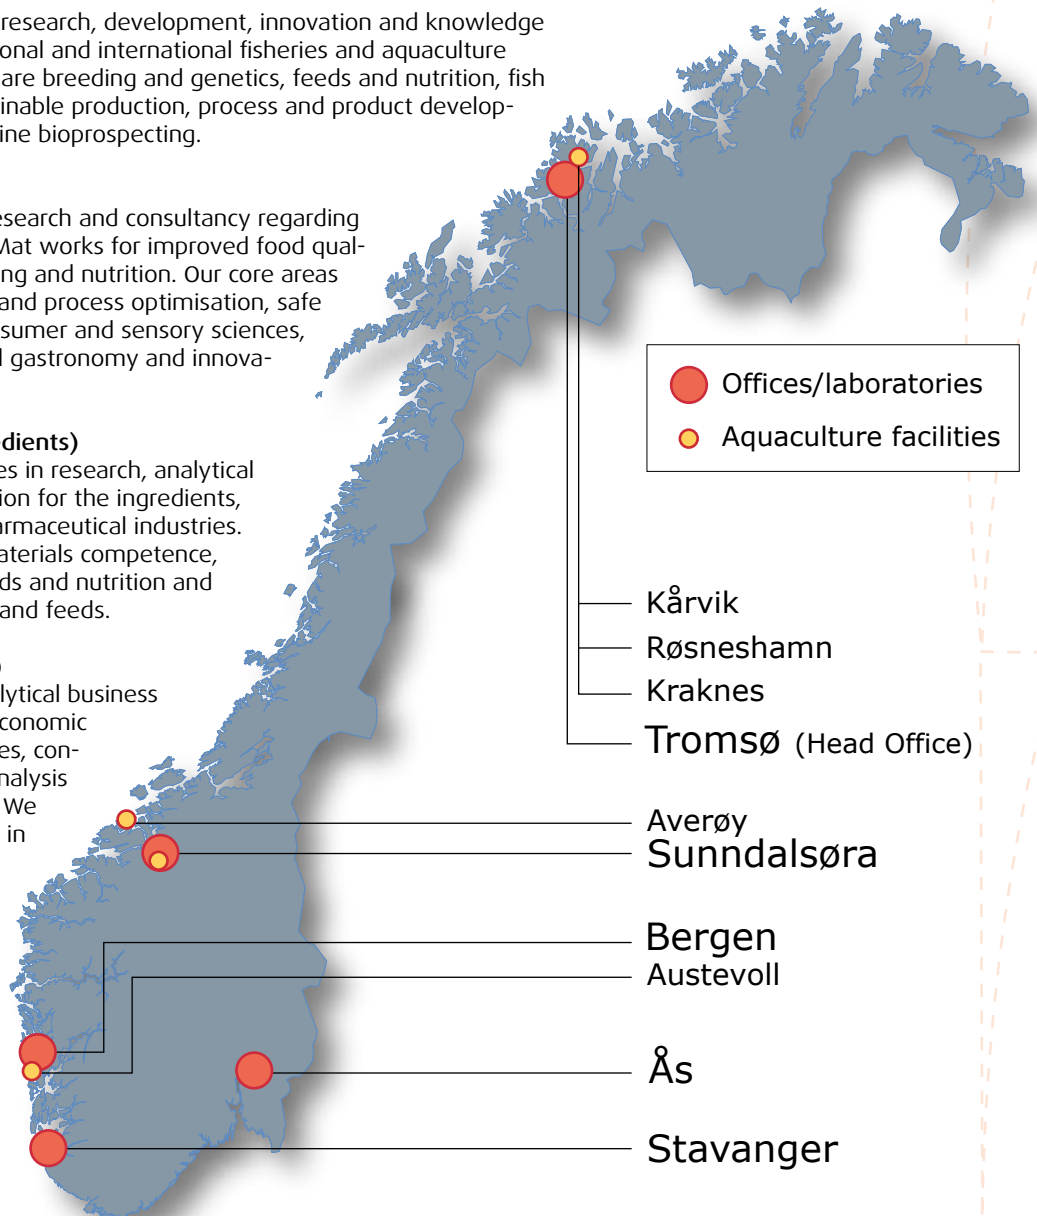

Nofima Ingrediens engages in research, analytical services and pilot production for the ingredients, aquaculture, food and pharmaceutical industries. Our core areas are raw materials competence, by-product utilisation, feeds and nutrition and processing of ingredients and feeds.

Nofima Marked (market)

Nofima Marked is our analytical business division, which provides economic analyses, foresight analyses, consumer research, market analysis and strategic consultancy. We can also offer consultancy in information logistics and traceability.

Our offices

The group's head office is located in Tromsø in Northern Norway, while the research divisions are located in six places throughout Norway: Ås, Stavanger, Bergen, Sunndalsøra, Averøy and Tromsø.
